

Dear David,

We thank ANTECH-Hydraulics for providing excellent service support to Topaz engineering Hydraulics division under the patronage of Manuel Tavares. We very much appreciate that you gave freely of your time to demystifying our technical queries like a Hydraulics Search Engine. You may be interested to know that the overall confidence we have on Antech for our Hydraulic technical solutions, service supports or for meeting (sometime) unreasonable delivery schedules, no matter were met with very positive results.

Having established closer business relationship with Antech since 2009, we are confident that our bonds of cooperation would become stronger day by day.

With warm regards,

Stevenson
